

# Pragmatic Deployment of Automation and AI for Mission-Critical Outcomes

SBA 8(a) Certified | VetCert SDVOSB | HUBZone

Resolute delivers automation and AI for mission-critical systems. We work side-by-side with your teams to understand the mission, then deploy automation and AI to improve the performance of the systems and processes you already have. The result is modernization-level impact without a full rip-and-replace.

## CAPABILITIES

<b>SAP Test Automation</b>	Automated and Agentic regression and continuous validation
<b>FIAR Audit Readiness</b>	Agentic AI accelerates audit package creation, flags discrepancies, and improves evidence quality
<b>Legacy Modernization</b>	Overlay AI and automation on underfunded legacy systems and processes for improved performance
<b>AI-Enabled Automation</b>	Deploy UiPath + AI to eliminate manual tasks, connect siloed systems, and improve throughput
<b>Agentic Solutions</b>	AI agents that orchestrate workflows with humans-in-the-loop for secure, auditable execution
<b>SAP Acceleration</b>	SAP S/4HANA and ECC expertise to speed configuration, cut sustainment tickets, and stabilize operations
<b>Mission Support</b>	Cleared teams supporting SOUTHCOM, DLA, and other DoD missions with secure, compliant delivery

## PAST PERFORMANCE

- Navy ERP+ SAP S/4HANA** — **SUB** (Deloitte) — FIAR audit remediation, SAP financial integration. *N0018922DZ017*
- DLA R&D Process Automation** — **PRIME** — AI/automation for legacy warehouse management systems. *SP4701-26-P-0008*
- Naval War College Cloud** — **PRIME** — Microsoft cloud migration and managed services. *N0018926PZ016*
- USACE UiPath RPA** — **PRIME** — Robotic process automation and document understanding AI. *W916TX52304631*
- DLA SAP Support** — **SUB** (Accenture) — Professional services support for DLA business systems. *SP330023D00010*
- DLA SAP WMS/FLIS** — **SUB** (C5MI/AFS) — SAP EWM/TM. First S/4HANA in DoD. 86+ go-lives, 4,000+ tickets. *SP470123A0005*

## Understanding Automation in Mission Environments

Automation is not one thing. It is a spectrum of capabilities applied to the right problem at the right level. From task execution to AI-driven decision support, the goal is the same: eliminate work that machines should do so people focus on judgement, decisions, and mission execution. We apply this spectrum across four domains:

**01 Task Automation** — Bots execute repetitive, rule-based work across enterprise systems—data entry, reconciliation, file routing - the foundation.

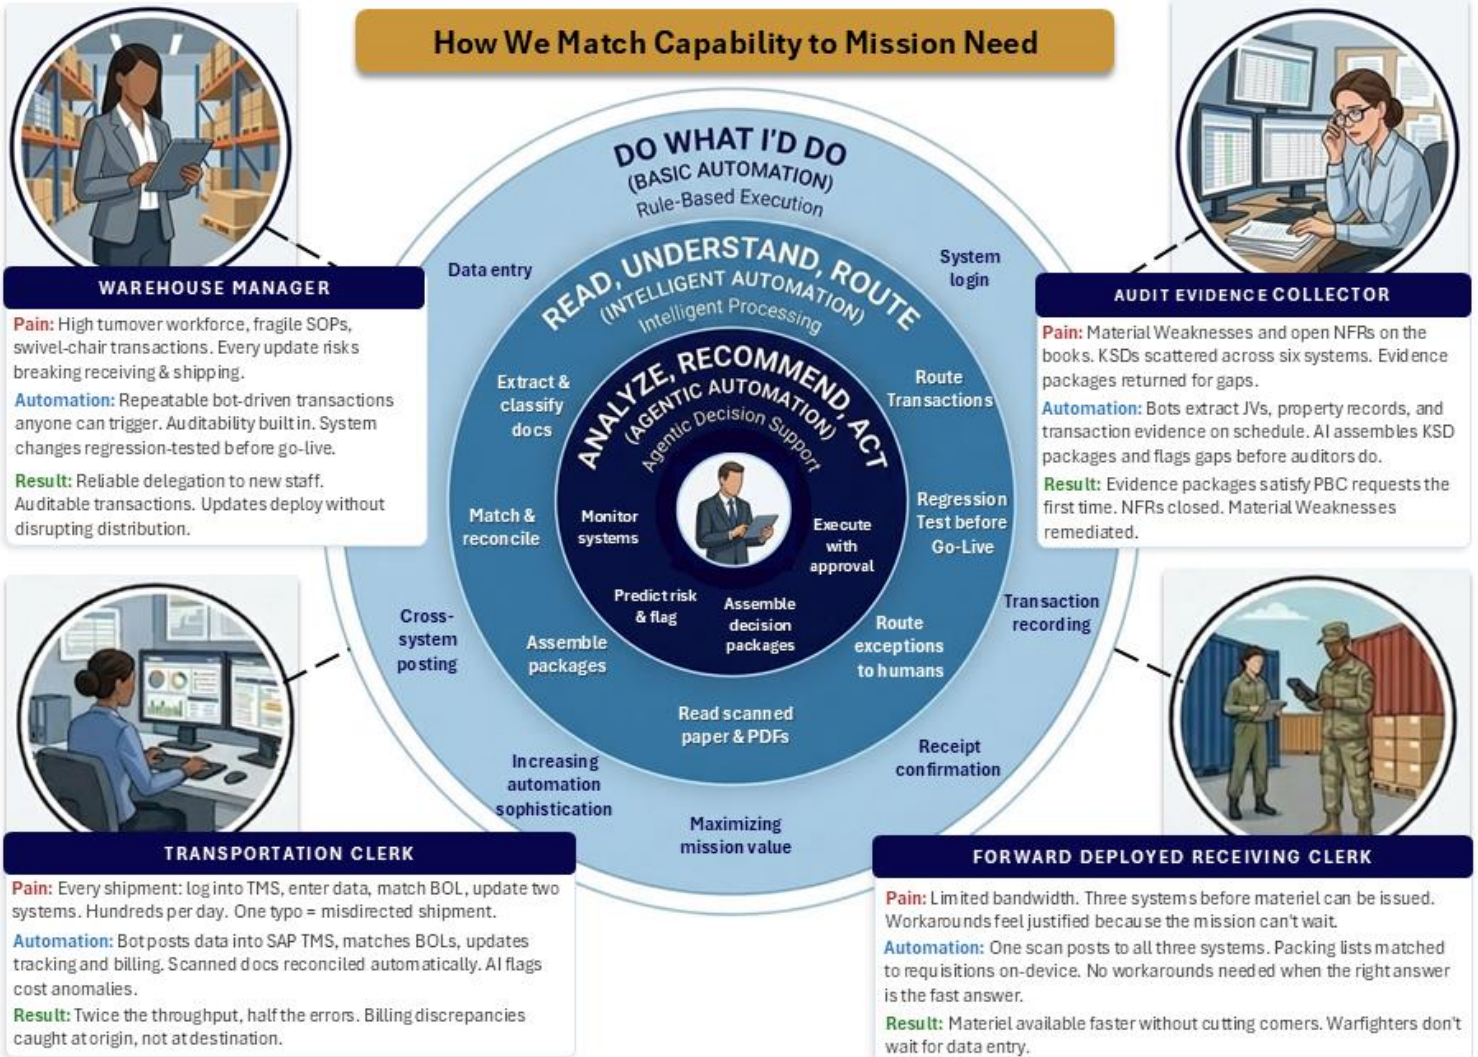

**02 Test Automation** — Every SAP transport, configuration change, and upgrade is validated before production to catch issues early and reduce disruption.

**03 Agentic Audit** — AI agents help assemble PBC packages, identify evidence gaps, and present recommendations for human review.

**04 Legacy Modernization** — AI and automation applied to systems in sustainment with O&M-only budgets. Extend system life and improve performance without rip-and-replace.

## Mission Outcomes Through Intelligent Automation

### How We Match Capability to Mission Need

## HOW WE ENGAGE

**01 Discover**  
We embed with your team, understand the need, identify highest operational impact, and give you a candid "no" when automation is not the answer

**02 Design**  
We match the problem to the right toolset and design robust solutions without gold plating

**03 Deploy**  
We deliver on a fast timeline and measure results against mission outcomes: cycle time, error rates, audit issues closed, and labor hours recovered
